### ▼ Our Goal

Toward the realization of sustainable environments and companies, leveraging a regional network and international exchanges with talent linking the foreign to local, we aim to promote support programs for the acceptance, employment, and entrepreneurship of foreign talent (exchange students, workers, etc.), training programs for globally active talent, and a community planning for a multicultural society.

### ▼ Significance of the International Student Entrepreneurship Program

1. Follow-up support to meet the needs of international students interested in starting businesses
2. Creating a place to network with fellow entrepreneurs and peers because many become isolated and solitary.
3. Support for high-skilled international talent without opportunities to acquire the necessary knowledge and skills to start businesses and have trouble getting their businesses moving

### ▼ Link to SDGs (Sustainable Development Goals):

Of the sustainable development goals, we aim to do the following:

4. Provide all people with inclusive, fair, and high-quality education and promote opportunities for lifelong learning.
8. Promote lasting, inclusive, and sustainable economic growth, productive full employment and decent work (meaningful and humane work) for all people.
